

Section 1 — Copy Menu Instructions

37%

of Glovo's 279 MDS failures were **Copy Menu Instructions** — vendors submitted a Backend ID reference, GRID code, or QR code pointing to another vendor's menu instead of uploading their own menu document.

Copy instruction cases by country/entity:

Entity	Cases	% of Copy cases
GV_IT	68	66%
GV_ES	18	17%
GV_PT	7	7%
GV_BG	5	5%
GV_PL	5	5%
TOTAL	103	100%

Section 2 — Invalid Submission Breakdown

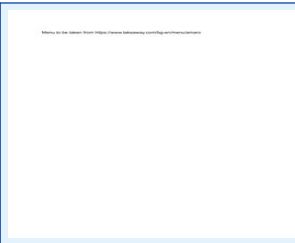

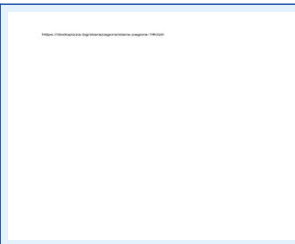

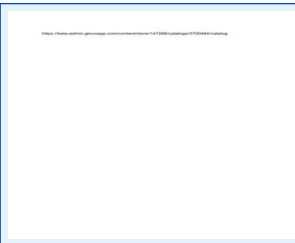

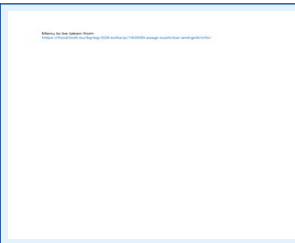

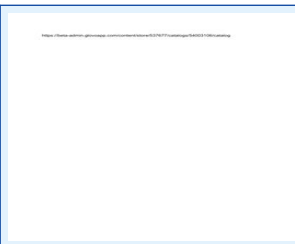

The following categories represent submissions that are clearly not restaurant menus and need to be corrected before resubmission.

Category	Cases	% of All Errors	Common Examples
Irrelevant / Invalid	122	43.7%	Website Screenshot (47); Blank Submission (39); Legal/Contract Document (12)
TOTAL — Invalid Submissions	122	43.7%	

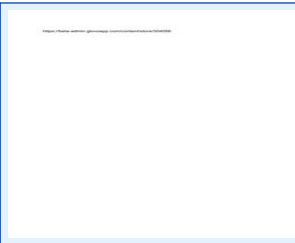

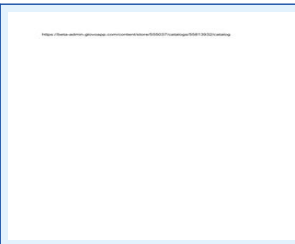

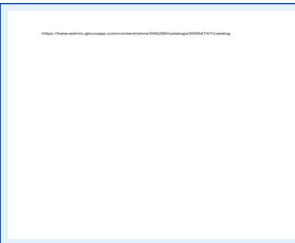

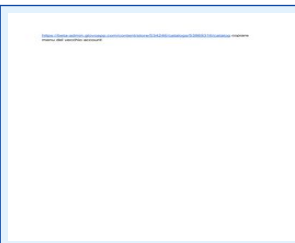

Of the 122 Invalid Submissions, 41 were confirmed as genuine menus.

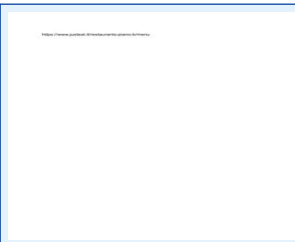

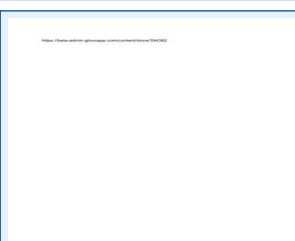

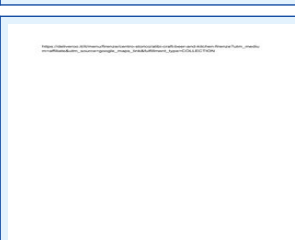

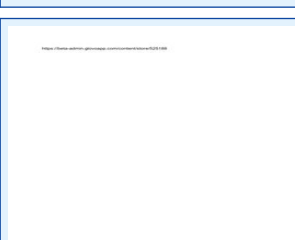

41 confirmed and an estimated **~51 total** (18.3% of Glovo's errors) appear to be genuine restaurant menus that the MDS pipeline rejected due to technical constraints (resolution, file format, or low item count). These cases are flagged in amber in the case pages.

An additional 11 Excel/CSV submissions were not stored in MDS — from a sample of 20 downloaded files, 19 (95%) were confirmed genuine menus.
