

Section 1 — Copy Menu Instructions

14%

of Pandora's 166 MDS failures were **Copy Menu Instructions** — vendors submitted a Backend ID reference, GRID code, or QR code pointing to another vendor's menu instead of uploading their own menu document.

Copy instruction cases by country/entity:

Entity	Cases	% of Copy cases
FP_PH	24	100%
TOTAL	24	100%

Section 2 — Invalid Submission Breakdown

The following categories represent submissions that are clearly not restaurant menus and need to be corrected before resubmission.

Category	Cases	% of All Errors	Common Examples
Irrelevant / Invalid	69	41.6%	Blank Submission (32); Website Screenshot (8); Onboarding/Operational Document (4)
Logo / Branding	5	3.0%	Restaurant logos, brand images, watermarks
TOTAL — Invalid Submissions	74	44.6%	

Of the 68 confirmed cases, 68 are confirmed as genuine restaurant menus.

68 confirmed and an estimated **~68 total** (41.0% of Pandora's errors) appear to be genuine restaurant menus that the MDS pipeline rejected due to technical constraints (resolution, file format, or low item count). These cases are flagged in amber in the case pages.
