

Section 1 — Copy Menu Instructions

26%

of Talabat's 194 MDS failures were **Copy Menu Instructions** — vendors submitted a Backend ID reference, GRID code, or QR code pointing to another vendor's menu instead of uploading their own menu document.

Copy instruction cases by country/entity:

Entity	Cases	% of Copy cases
TB_JO	31	62%
TB_IQ	10	20%
TB_AE	5	10%
TB_OM	4	8%
TOTAL	50	100%

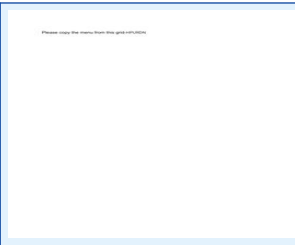

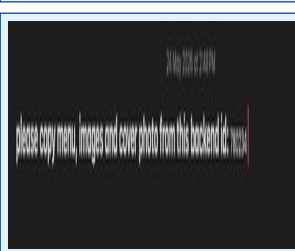

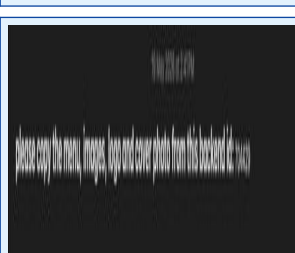

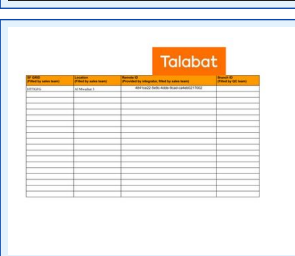

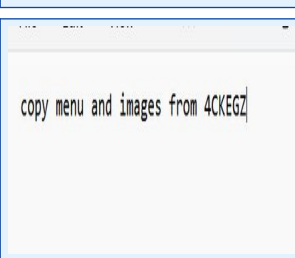

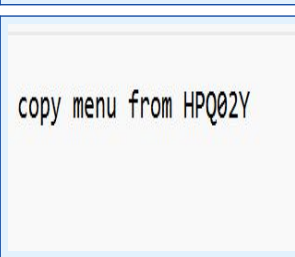

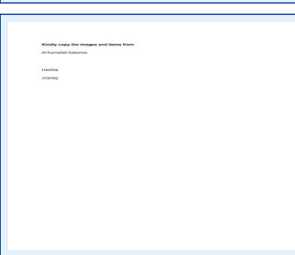

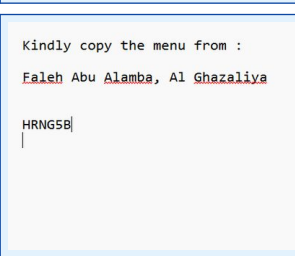

Section 2 — Invalid Submission Breakdown

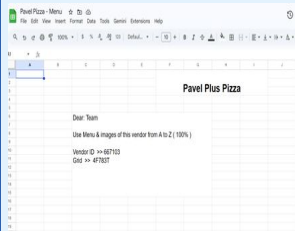

The following categories represent submissions that are clearly not restaurant menus and need to be corrected before resubmission.

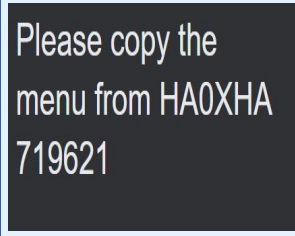

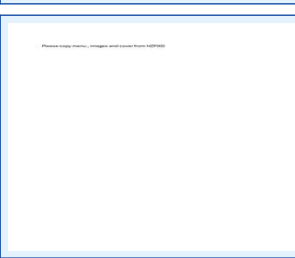

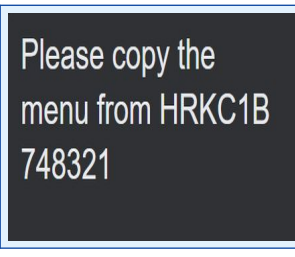

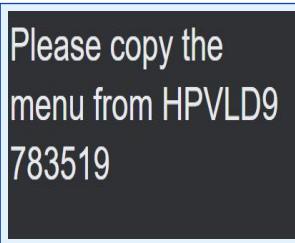

Category	Cases	% of All Errors	Common Examples
Irrelevant / Invalid	62	32.0%	Legal/Contract Document (46); Blank Submission (7); Identity Document (4)
Logo / Branding	24	12.4%	Restaurant logos, brand images, watermarks
Food Photo	1	0.5%	Food photographs without prices or menu structure
TOTAL — Invalid Submissions	87	44.8%	

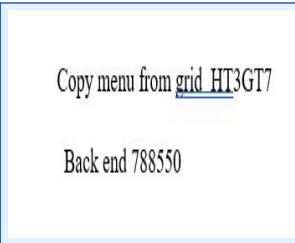

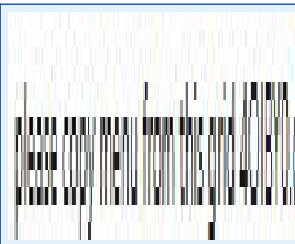

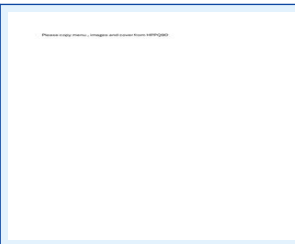

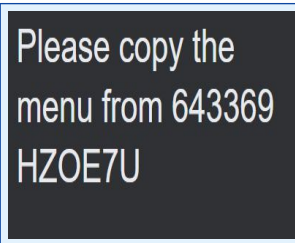

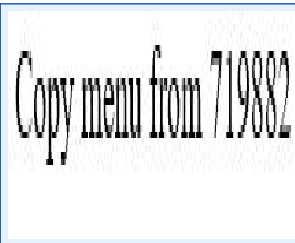

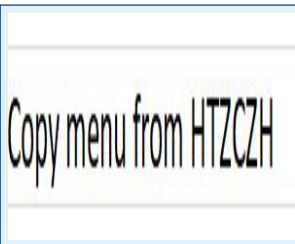

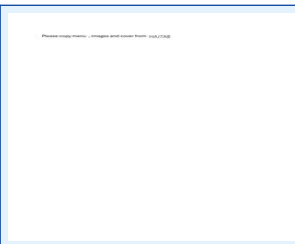

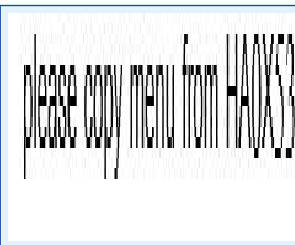

22 confirmed and an estimated **~54 total** (27.8% of Talabat's errors) appear to be genuine restaurant menus that the MDS pipeline rejected due to technical constraints (resolution, file format, or low item count). These cases are flagged in amber in the case pages.

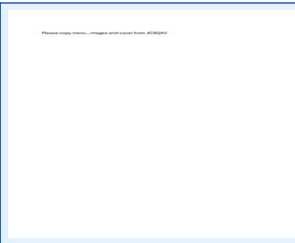

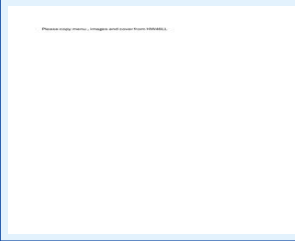

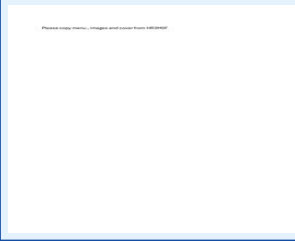

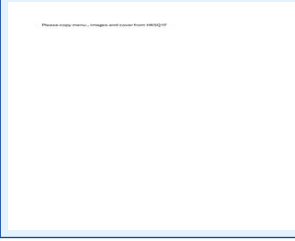

An additional 34 Excel/CSV submissions were not stored in MDS — from a sample of 20 downloaded files, 19 (95%) were confirmed genuine menus.

	HT0685 · TB_AE · Not a Menu Document · Code 3015 · PDF Submission ID: TB_AE_20260525T144852_1100464 Backend ID / Grid Copy Instruction (high confidence) The image contains only the instruction 'Please copy the menu from this grid-HPURDN', which is a grid/vendor ID copy instruction with no actual menu content. ■ Copy/GRID ref
